# Sophie Wirth

## Curriculum Vitae

a.sophiewirth@gmail.com

*I am a Developer from Berlin. I studied Media IT at the Beuth University of Technology, focusing on building software, made with the User in mind. I love being able to connect the human and the technical side of my job, creating products that don't forget about who they are for. The details are as important as the big picture, so I make sure to not let either out of my sight. Improvement and innovation should be the goal of every good Developer, while striving for maintainability and excellence in their work.*

## Core Skills

I have gathered both back-end and front-end experience, am a problem solver and keen on always delivering the best result. I am an analytical thinker and level headed, especially when facing big tasks. I am a very visual person, love creating UIs and working with design work, though I do enjoy the theoretical and logical parts of my job as well.

## Back-End Skills

- Python
- Django

- Wagtail
- FeinCMS
- PSQL
- LoopBack
- RESTful APIs
- HTTP Protocol

## Front-End Skills
- Javascript
- React
- Redux
- HTML/CSS (Sass, Scss)
- Responsive Web Design
- Flex
- Bootstrap/Foundation

## Design Skills
- Logo Design
- UI/UX Design
- Figma/Sketch
- Adobe Creative Suite (PS, AI)

## (Human) Languages
- Fluent English - spoken and written
- Native German Speaker

## Work History

### Shipamax - Full-Stack (June 2018 - Today)

In the Spring of 2018, I decided to relocate from Berlin to London and shortly after started working for Shipamax. Shipamax is a Startup, build to help Bulk Shippers and Freightforwarders deal with the daily challenges of their job. It offers a host of features, from dynamic search functionality to optical processing and document parsing. My duties included:
- Implementing entire applications, such as a plugin for FrontApp, from scratch.
- Coming up with Complex Solutions to Feature Requests.
- Building on top of the existing Ract and Redux stack and mainting code.
- Writing Server-Side code for sql data processing.
- Writing API Endpoints and Structuring their Responses.
- Connecting the API Endpoints to our Frontend for Data Entry and Response visualisation.
- UI/UX Implemantion to Optimise User Workflows

and Accessibility.

### *Jonas Und Der Wolf - Full-Stack (June 2017 - May 2018)*

After finishing my Media IT degree, I started working at the agency "Jonas Und Der Wolf", where software solutions for data driven web platforms are developed. Together with the costumers, product and software challenges are faced and overcome. My duties included:

- Implementing Frontend and Backend Solutions for Product Requirements
- Maintaining the Project Infrastructure
- Refactoring and Reworking Legacy Code into smart, modern Solutions
- Code Reviews and Testing
- Rethinking and Restructuring Working Processes

### *Thermondo - Working Student Front-End (January 2016 - May 2017)*

After almost a year in the back-end, I applied to become a part of the front-end team in Thermondo. I am a very visual person and love working with website design. My duties in the front-end included:

- Outlining and Implementing new Features
- Self-sustained Problem Solving
- Communication with other Departments in the Company to solve their Needs
- Developing in-Company Apps by Myself
- The Co-Conceptualisation and Co-Implementation of a New Website and Technology Stack

### *Thermondo - Working Student Back-End (March 2015 - January 2016)*

I was hired by the company Thermondo in the back-end as a working student, in 2015. My duties included:

- New Implementation of Features
- Writing Tests
- Improving already existing Features
- Writing SQL Queries
- Self Guided Working

## Education

### *Beuth Hochschule für Technik (Oct 2013 - Mar 2017) Berlin, Germany*

- Bachelor of Science (Media IT)
- Final Grade - Ø 2.0 (equivalent: 86%)

### *FU (2012 - 2013) Berlin, Germany*

- Bachelor of Education (German/English)
- Cancelled, to pursue a degree in Media IT

*Felix-Mendelssohn-Bartholdy-Gymnasium (2006 - 2012) Berlin, Germany*

- Abitur (Ø 2.2)
